## **DETAILED ACTION**

### ***Response to Amendment***

1. This Office Action is in response to applicant's amendment dated 09/21/2004 in response to PTO Office Action dated 06/30/04. The applicant's remarks and amendment were considered with the results that follows.
2. Claims 1-9 have been presented in this application for examination. No claims has been canceled or added. Therefore, claims 1-9 remain pending in the application.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The underline in the following phrases "storing information regarding the state of data exclusively in an interconnect" and "such that the interconnect is a sole repository

of cache coherence information within the multiprocessor system" are not supported by the specification. Applicant's arguments is regard to these new matter are not persuasive, because disclosing an interconnect not necessarily make one to conclude that the interconnect is storing the state information exclusively not make the interconnect the sole repository of the cache coherence information.
